A more personal way to go.

Wyld Wandering

Personal travel planning.
An identity grounded in hospitality, curiosity and care.

One identity. Every setting.

Primary stacked lockup

Horizontal lockup

Wordmark

Standalone monogram

All logo lettering is outlined. SVG and PDF files contain editable vector paths, with no fonts or embedded photographs. Light = forest artwork for light backgrounds. Dark = ivory artwork for dark backgrounds.

Room to breathe.

Keep at least one quarter of the monogram’s height clear around the visible artwork. For the wordmark alone, use one quarter of the lettering height. Measure from the artwork, not the file edge.

Place the mark on a quiet, high-contrast surface. Keep the original proportions and approved color.

Recommended minimum widths

Asset	Screen	Print
Stacked	220 px	45 mm
Horizontal	280 px	60 mm
Wordmark	200 px	45 mm
Monogram	48 px	12 mm

Use the heavier small-symbol artwork for 16–47 px web icons. Always review at actual size; fine strokes need more space on absorbent paper or textured materials.

Keep the artwork intact

No stretching, rotation, shadows, gradients, outlines or rearranged lettering. Do not recreate the wordmark by typing the brand name.

Warmth, with restraint.

Forest

#0F1A14

RGB 15 / 26 / 20

Primary logo, text and dark surfaces

Ivory

#FFFBF5

RGB 255 / 251 / 245

Main light surface and reverse logo

Terracotta

#C45D3A

RGB 196 / 93 / 58

Selective emphasis and accents

Amber

#D4A857

RGB 212 / 168 / 87

Small decorative details

Lead with forest and ivory

Use forest text on ivory, or ivory text on forest. Reserve terracotta for emphasis and amber for fine details. Avoid amber text on ivory.

Use the supplied values

All master artwork uses exact sRGB colors. The package includes CSS, JSON and a GIMP palette. For print, have the printer convert from the vector PDF using the profile for the selected paper and process.

Editorial, never ornamental.

PRIMARY DISPLAY / CORMORANT

Places worth finding.

Cormorant Medium or Semibold for headlines. Use italics sparingly. Give headings generous space.

PRIMARY BODY / OUTFIT

The right hotel.
The thoughtful details.
Your trip, handled.

Outfit Regular or Medium for body copy, captions and navigation. Keep paragraphs easy to scan.

Practical type scale

Role	Screen	Documents
Display	48–80 px	30–48 pt
Section title	28–40 px	18–24 pt
Body	16–20 px	11–12 pt
Small label	12–14 px	9–10 pt

Office templates

The editable templates use Georgia and Arial as practical fallbacks. The logo stays identical because its lettering is artwork. Cormorant and Outfit font files and their OFL licenses are included for design and web work.

Install the supplied fonts before applying the primary pair in a design application. Recheck wrapping after changing fonts. Georgia and Arial font files are not redistributed.

Speak like someone who knows.

The voice

Personal, direct and informed. Explain why a place is worth a client’s time and what makes it right for that particular trip.

Use concrete details: the room, the neighborhood, the morning walk, the reservation. Keep confidence grounded in what is known or confirmed.

Core language

Your trip, handled.

Primary headline

Places worth finding.

Supporting editorial phrase

Descriptor: Personal travel planning.

Photography

Choose distinctive places, human-scale architecture, natural light and considered details. Favor a sense of being there over a catalog of attractions.

Allow one strong image to lead. Keep horizons straight, color believable and space around typography. Use only imagery you own or have permission to use.

Writing example

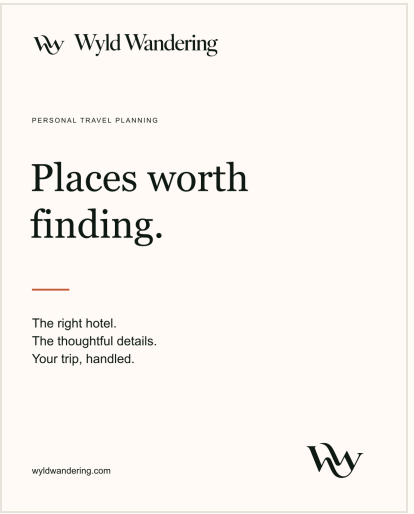

A quiet courtyard, a walkable neighborhood, and a room worth lingering in.

This is illustrative style copy. Use property-specific details only after confirming them.

Avoid generic superlatives and promises of upgrades, access or availability unless confirmed for the booking.

Ready for the next trip.

Social assets

1080 px avatars in three colors; square, portrait and vertical brand cards; 1500 × 500 wide banners in light and dark.

Keep essential content away from platform controls. Preview the actual crop before posting.

Editable templates

Square, portrait and story layouts in light and dark. Eight client presentation slides. A three-page itinerary, letterhead and business cards.

SVG files keep live text and vector artwork. PowerPoint files keep editable text and shapes.

Make it yours

Duplicate a template, replace bracketed copy and add your own photograph. Keep the photo within its placeholder area.

Export a fresh PNG or PDF and review it before sharing. Template placeholders are not publishable content.

Use the right file.

01 Logos

SVG: scalable artwork for design and web.
PDF: vector artwork for placement and print.
PNG: transparent images for everyday use.

02 Social

Finished brand cards, avatars, banners and web icons. SVG source and PNG exports are paired by filename.

03 Templates

Five PowerPoint files covering social, itineraries and client presentations. Individual SVG layouts are also editable. Print layouts include PDF proofs.

04 Guidelines and 05 Source

This guide, fonts and licenses, palette files, master monogram and wordmark artwork, and provenance notes.

Business cards

Trim: 3.5 × 2 inches. Bleed: 0.125 inch on every edge. Artwork size: 3.75 × 2.25 inches. Keep live content at least 0.125 inch inside the trim. PDF TrimBox and BleedBox are supplied.

Print workflow

The PDFs are RGB vector artwork. Confirm the printer’s preferred color conversion and stock, then review a proof. The itinerary and letterhead use US Letter dimensions.

Editing workflow

Open PPTX in PowerPoint or import it into your slide editor. Open SVG in a vector editor; text remains editable. Logos are fixed artwork in the slide templates; the SVG masters allow path editing.
